MODERN DECORATIVE POLES

MADO
LIGHT

ABOUT US

Herafion Lighting is a leading company considered as one of the national companies specialized in the manufacture of lighting poles. Herafion was Established in 2009 and it's based in Jeddah - KSA. herafion Lighting has successfully completed numerous large-scale turnkey projects for many prestigious clients in different sectors including:

1. Lighting poles for highways and main roads.
2. Lighting poles for Gardens in different regions in the Kingdom.
3. Hazardous Lighting for oil, gas and petrochemical industries.
4. Copper Lanterns and chandeliers for mosque and palace.
5. Commercial Lightings for Palace, Villas, offices, Hotels, Towers, Mall...

Mission

Herafion is committed to provide the highest quality product possible through our highly skilled and dedicated employees and state-of-the-art and manufacturing process. Proper employees are expected to serve the customer with the highest level of technical knowledge in the industry. That result in customer and employee satisfaction.

Vision

We aim to be the country's leader in providing indoor and outdoor lightings and related services and make lighting more effective, efficient, cost-effective, and enviro-friendly.

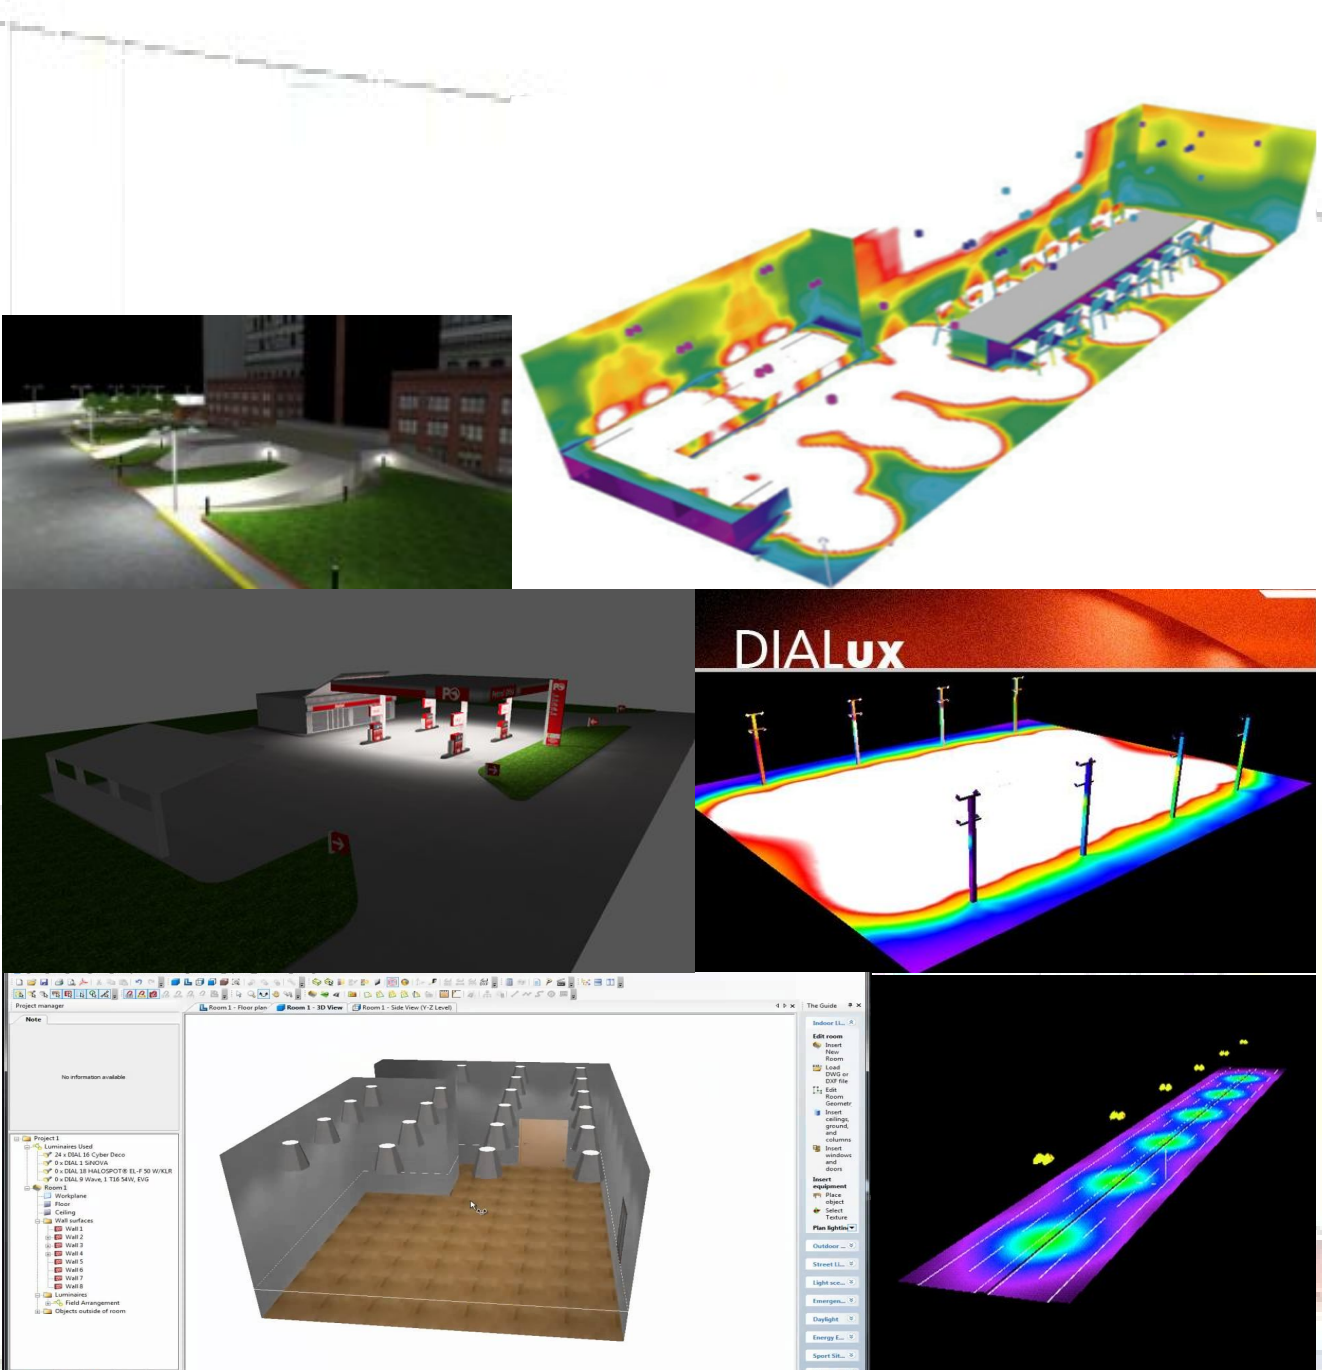

Herafion has positioned itself as a market leader in the Kingdom for the design and distribution of architectural, industrial and commercial lighting solutions. It distributes a diverse range of light fittings to the industrial and wholesale markets.

The following is an overview of our products and company divisions :

LIGHTING DESIGNER DEPARTMENT

In this section, a group of engineers and designers are specialized to carry out studies and required maps for the implementation of interior and exterior lighting projects for factories – Oil & Gas Plant - offices - hospitals - schools - universities - Malls - government departments - stadiums - tunnels etc ...

Our Lighting engineers help you to design Dialux Lights Simulations & LED lighting FOR FREE

MANUFACTURING OF DECORATIVE POLES

- This section is specialized in the manufacture of decorative Poles of aluminum and Steel, for the gardens, streets and public squares...

On the other hand, herafion deals with HDG Octagonal, Conical and Fiber Glass street lighting poles.

All our lighting poles are recognized by MOMRA & SASO .

- All our lighting poles are recognized by SASO and tested by **BUREAU VERITAS**.

TEST METHODS:

BS ES 40-1

BS EN 40-3-1/2013

BS EN 40-3-2/2013 TEST LOAD , ACCEPTANCE CRITERIA

BS EN 40-3-3/2013 ACCEPTANCE OF DESIGN FOR DEFLECTION

TOP POST MODERN DECORATIVE POLE

Steel

Quality

Shaft of Pole: Steel grade Fe 510c or equivalent. Base Plate & Bracket: Steel grade St 37.2.

Machining

Holes required for fixing to poles are drilled. The fixing part for the luminaires is prepared based on the model. All fasteners are stainless steel AISI 304.

Finishing

After machining, welding, grinding, sanding, and ensuring all impurities are removed, a two-component primer is applied to increase adhesion.

Hot-Dip Galvanization: Applied according to ASTM A123, BS EN ISO 1461, or equivalent standards.

Final Polyurethane Layer: Applied for color, typically 60µm thick, but it can reach up to 85µm. The usual color is black. For other colors, please indicate the RAL number.

Extruded Aluminum

Quality

The shaft and bracket are made from extruded aluminum, specifically Alloy 6063, with a T6 tempering treatment. The base plate and decorative parts are crafted from a eutectic alloy, known for its excellent casting properties, fluidity, and high resistance to hot tearing. These parts also offer good machinability, excellent weldability, and high chemical resistance. The material used is EN-AC-44100 casting, conforming to EN 1706 standards, with a casting strength of 7.8 kg/mm².

Machining

Holes required for fixing to poles are drilled, as well as the fixing parts for the luminaires, depending on the model. All fasteners are made of stainless steel, grade AISI 304.

Finishing

After machining, welding, grinding, sanding, and ensuring the removal of all impurities, a 60-micron thick polyurethane layer is applied for color, typically in matte black. For other colors, please specify the RAL number.

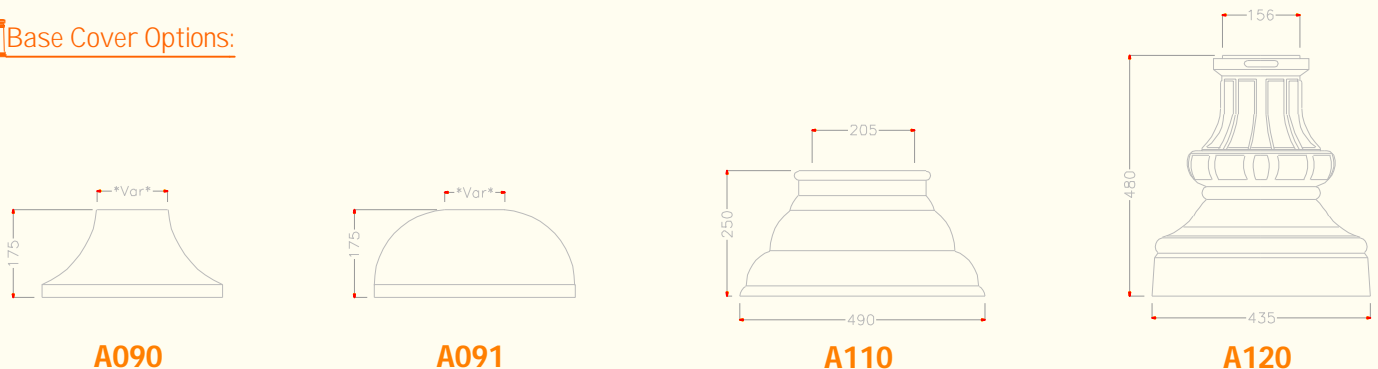

Resistance:

The development process for the pole or bracket is preceded by a finite element resistance calculation, with special attention given to areas of higher tension, thereby improving their resistance. This ensures the best stability of our products. During production, and at regular intervals, items are tested to identify any deviations.

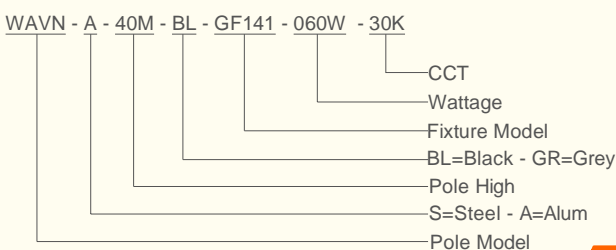

Fuse Box: Available In Pmma ,Steel ,Aluminum

AnchorBolts: Available in Cold Galvanized , Hot Dipped Galvanized , Stainless Steel ANSI 304
